

RISK ASSESSMENT GUIDANCE FOR A SAFE RETURN TO WORK/SCHOOL DURING THE CORONAVIRUS PANDEMIC

Children, Young People, Education and Skills

The following risk assessment is designed as a guide only in the types of issues to consider when undertaking a risk assessment for potential exposure to Covid-19 in the workplace. As a manager you should complete the risk assessment together with your employees as it is important to ensure all the relevant facts and issues are covered.

As part of your risk assessment development you will need to review your workplace/school and consider the following:

- Can staff maintain a 2m physical distance between each other?
- How will you manage meetings, interviews and other interactions?
- What about communal areas such as toilets, carparks, playgrounds, reception areas, canteens or kitchen areas?
- How can you support teams so that they can work together while maintaining social distancing? Consider resource, in terms of numbers, and staggering working hours so that not all staff are in at the same time

During the current pandemic please ensure that the control measures are appropriate to the situation. You should not place staff/students at undue risk but do make sure that the control measures are practical, suitable and sufficient.

RESPONSIBILITIES

All Employees must:

- Follow all control measures identified in risk assessments to promote safe working during the pandemic
- Report any accidents, incidents or near misses that may occur
- Report any hazards or potential hazards they might have in respect of Covid-19 to their manager

All Managers must:

- Ensure that risk assessments for managing Covid-19 are carried out in collaboration with staff and reviewed regularly throughout the period of lockdown and safe exit.
- Implement any controls, procedures or safe systems of work identified in risk assessments
- Monitor employees to ensure they are conforming to all controls, procedures and safe systems of work.
- Record all comments and concerns from employees and Unions on any aspect of the risk assessment

Departmental health and safety representatives and advisers should:

- Support managers to ensure risk assessments are completed and control measures implemented

[H&S representatives and advisers](#)

Other areas to consider:

1. Communication and Advice - Managers are strongly advised to follow information given out by the central comms team and on gov.je regarding coronavirus to make sure they do not propagate mixed messages

2. Supporting Staff – As a manager you are encouraged to be mindful about ways in which you can support staff who may be working in a variety of roles, which may be different to their usual day to day tasks and activities. If staff are required to work in isolation, then please make arrangements for regular contact to be made with them. Similarly, if they are in an unfamiliar role do check regularly on their safety and wellbeing

3. Health and Safety – When carrying out this risk assessment, think about all aspects of contact with others and maintaining good hygiene practices at all times. You should not ask individuals to place themselves at risk either from the virus or through changes in their work activities which may pose other physical risks to them e.g. shared equipment or work spaces.

4. Other health conditions – For individuals who may have a medical condition or disability that is not classified as an underlying medical condition for Covid-19, managers should complete an individual care plan to ensure suitable provisions are in place if they return to the work place e.g. adequate first aiders (subject to the risk assessment below)

Additional information and control measures for your consideration/risk assessment development

1. Preparing the Site

The location of hand sanitiser stations, at the school entrance for pupils and any other person passing into the school to use, and their replenishment are in place. Hand washing with soap and water for 20 seconds and frequently is promoted by GoJ and encouraged by all staff at regular intervals..

The location of lidded (pedal) bins in classrooms and in other key locations around the site for the disposal of tissues and any other potentially infected waste. Double bagging and emptying has been considered and applied.

There is a good supply of disposable tissues in each classroom and enough to top up regularly, as well as lidded bins with double bagging for disposal, with any other potentially infected waste, and where these should be located.

2. Health and Safety

Ensure that you are working in line with the general principle of undertaking risk assessments to safeguard employees against several scenarios, including:

- lone working (both at a work premises and at home) - completed
- severely vulnerable and vulnerable to COVID-19 - n/a currently
- those attending work but living with a household member who's severely vulnerable
- stress risk assessment – n/a currently
- homeworking. – not applicable currently

3. PPE and the use of cloth masks

Employees wear provide face shields or their own cloth masks – only when walking round school or working in another bubble – June 21st 2021.
